

Proposed ARPA Program or Project:	Residential and Commercial demolition Program
Program or Project Description:	Renovations and upgrades to city of Toledo Community and Senior Centers.
Proposed Amount:	\$3,000,000 – spending to occur in various phases.

SMART Analysis Element	Program or Project Analysis and Explanation
Sustainable	Improvements made to the centers will be more energy efficient, reducing utility costs. Some of the facility of improvements will have a usual life of more than 20 years (i.e. windows, doors, roof).
Meets Guidelines	The community and senior centers receiving improvements are the heart and support of many Toledo neighborhoods. Toledoans who were negatively impacted by the pandemic rely on these the services the centers provided to them including daycare, healthcare, food and recreation. Compliance and Reporting Guidance Service to disproportionately impacted communities. Page 4373 Rules and Regulations – Investment in neighborhood features”
Accountable	Each facility will be bid and work performed individually. This will all be tracked through our procurement process and multiple department oversight.
Return on Investment	The improvements will provide energy savings and reduced annual maintenance costs. Addiotnally, a number of community partners rent the space and provide services to the neighborhood. These improvements provide a safe and useable space for our tenants and community partners.
Transparent	Total amount of facility improvements made will be recorded and reported in the Local Fiscal Recovery Fund and reported as required by the U.S. Treasury.
