

DPS 2021 SBH MLK Bridge Electrical Repairs - \$70,110

- MLK Bridge is a 107 year old Scherzer rolling lift movable span bridge. Rehabilitated from 2002 to 2008 for total cost of about \$75M
- Annual maintenance costs of this style and age of bridge should be expected to run \$100,000 to 300,000 on average
- Replacement cost for this bridge would be more than \$200M
- Electrical wiring is shorting out in the conduit at the pit level in both sides of the lift span and needs to be replaced. New conduit will be run above high water level of the river
- TAS, Inc. is a small female-owned business located within one (1) mile of the bridge; the City of Toledo has counted on this company for emergency electrical responses over the past several years. All employees are IBEW – paid union wages
