CALLING ALL LANDSCAPE CONTRACTORS

The City of Toledo is launching an exciting pilot program to evaluate the performance and cost-effectiveness of electric riding mowers for municipal landscaping.

WE NEED YOUR INPUT IN ORDER TO MAKE INFORMED DECISIONS

WHAT WE KNOW

- Studies show lower total cost of ownership for electric.
- But, upfront cost of electric can be more than twice that of a conventional mower.
- Electric means less air pollution.
- Federal rebates of \$7,500 are available for electric.

WHAT WE DON'T KNOW

- Do they have the same cutting capacity?
- Is power of an electric mower the same as conventional?
- How long does a charge last in our climate?
- How easy are they to recharge?
- **Other factors we have not thought of!**
