

Suder Speed Limit Resolution Bullets
December 10, 2019

- The original request to modify the speed limits came to Transportation thru Toledo City Council which got a request from a resident.
- An ODOT qualified speed study was completed by City of Toledo –Transportation, Results and Recommendations were sent to ODOT for review. ODOT sent back their recommendations – the only modification was the Manhattan Boulevard to 101st Street section we recommended 40 MPH but ODOT said the data points showed a speed limit of 45 mph was more appropriate and should be posted as such.
- Once the Toledo Resolution has passed we need to submit request to ODOT for their final approval and sign off before making the field changes.
