

## **DPS 2021 CIP Mower with Mulching Head - \$160,000**

- There are several exceptionally steep areas within the City of Toledo that require mowing, specifically the bridge viaducts on Bancroft and Dorr Streets
- The incline prevents traditional mowing equipment from navigating safely
- The mowers that are being considered allow for remote operation, and have hardware and stabilization features that make mowing in steep areas feasible
- The addition of a mulching head attachment will make this mower more versatile, allowing for annual trimming back of lighter brush surrounding guardrails and at intersections
