To Whom,

In regards to the requested information concerning needed repairs to the (25) facilities that the Toledo Fire and Rescue oversees, a comprehensive list would require more time than can be allotted due to multiple pressing concerns at this moment. Of these (25) buildings, (18) are active Fire Stations

The Woolpert Facility Assessment survey was given to the City of Toledo and the Toledo Fire and Rescue Department in the fall of 2023. There are items of concern which are still applicable while many have been addressed. Included is the Executive Summary for the Woolpert Assessment.

The longer-term projects are much easier to trace and document but the needed repairs occur, at times, on a daily basis. The list would be contingent upon which day the list would be compiled. I have included the current Maintenance Work Order list as per this request.

Here is a list of the TFRD Fire Stations' addresses as requested:
