

TRIMBLE R12 SURVEY SYSTEM

BULLET POINTS

- Engineering Services owns two Total Station Survey Robotic Systems purchased in 2012 and 2013, one of which is no longer working and can no longer be repaired as both units have become obsolete.
- We are requesting to replace the older unit with a Trimble R12 which has the ability to track three times the satellites as the current survey system, as well as connects to satellites in dense and wooded areas, which allow surveys to be completed expediently.
- Precision Laser and Instrument, Inc. is the proprietary dealer for Trimble equipment in the Toledo Area.
- This purchase is being funded by the operating budgets of the Capital Improvement Program Fund, the Water Operating Fund, the Stormwater Utility Operating Fund, and the Sewer Operating Fund.
