

+

canvus

A thick, black, horizontal brushstroke that underlines the word "canvus". The stroke is slightly irregular and textured, resembling a hand-painted line.

Who We Are

Manufacturer of products
made from retired
wind turbine blades

Canvus

Inspiration

120 – 200 ft long

15,000-40,000 lbs

5,000–8,000

Blades reach the end of their life each year

Their size and durable material make them **difficult to recycle**

For years, Canvus has been working with the renewable energy industry to find a solution.

Each blade can be reimaged into 45-50 products, extending their lifespan by 20-40 years.

Our Mission

Inspire a community of sustainability *in motion* by reimagining retired materials to create functional art for all

Circularity

Waste is collected from post-consumer sources

Waste is transformed into new material

Products can be purchased and donated to parks, cities, and schools

Canvus uses secondary material to complete products

Retired Materials

rubber

Recycled material made from post-industrial and post-consumer sources like tires and shoes.

composite lumber

Recycled material made from plastic shrink-wrap and sawdust from wood milling operations

mixed polymers

Recycled material made from post-consumer and post-industrial packaging like milk jugs, containers, and bottles.

textiles

Surplus and unused textiles like carpeting, clothing, and PET bottles.

Product Makeup

Finishes

brilliant white

Designed with history in mind, the Brilliant White color pays homage to the original finish of the turbine blade.

cracked pepper

Born at the intersection of art and function, this sleek Cracked Pepper gray stands out in the modern world.

dark walnut

Designed for Parks, Dark Walnut praises and emulates the beauty of nature, and our environment

PAR (Primed + Ready)

Primed and Ready is a special coating we apply to the products allowing them to be painted. Engage with your local artists, students, and citizens to use our products as a canvas.
