

SMART Analysis

Proposed ARPA Program or Project:	Save Our Community
Program or Project Description:	Intervention arm of the initiative to reduce gun violence in community
Proposed Amount:	\$ 2,168,553

SMART Analysis Element	Program or Project Analysis and Explanation
Sustainable	Save Our Community is focused on three pillars - interrupting violence, identifying high risk individuals, and changing norms. These activities are aimed at long-lasting culture changes that reduce violence now and in future years, as social norms change and evolve.
Meets Guidelines	The US Treasury final rule includes community violence intervention programs as an eligible use. This includes practices including violence interruptors, street outreach, as well as wraparound services and capacity building efforts for intervention programs. Please see attached excerpt from the final rule.
Accountable	The Save Our Community initiative is managed by a Commissioner who reports up through the Director of Mayor's Office of Neighborhood Saety and Engagement.
Return on Investment	Save Our Community is one part of a comprehensive city-wide strategy to reduce gun violence. These collaborative efforts include: prevention to focus on the built environment (Housing, Development, Urban Beautification); enforcement through Toledo Police and the criminal justice system; and intervention (SOC).
Transparent	Expenditures are tracked in the city's financial system and progress reporting on outcomes is completed by the Save Our Community team.
