Web Based Linko Contract

Bullet Points

- Web-based Linko is existing software being moved to an online platform that will provide faster, upgraded performance of the current Linko software, which has performance issues due to its location on a city server.

- Future Linko updates are not supported by the server-supported software, but only by the online, web-based platform.

- The Division of Environmental Services uses this intricate database for all permit required recordkeeping on Industrial Pretreatment facilities.

- The Linko software contains over 10 years of data from the Industrial Pretreatment Program, and the staff who utilize the software have gone through years of training, therefore it has been requested to waive the competitive bidding process and enter into contract with Aquatic Informatics, the Linko software host.

- The contract will be for a 3-year term.

- Fees are as follows:
  - 2021: $5,650
  - 2022: $14,727
  - 2023: $14,949
