

DPS 2021 CIP Playground Replacement - \$300,000

- Of the 127 play systems in our City of Toledo Parks, more than 35% of them are more than 20 years old and many are in disrepair
- Through a nationally recognized assessment process, Parks staff have ranked these play systems according to their age and their level of safety
- With available funds, the systems at the following parks will be replaced:
 - Casey Jones Park
 - Feedback Park
 - Goodwin Park
- Neighborhood engagement and input are paramount to the success of these improvements. To that end, key constituents are being identified in the neighborhoods surrounding the above parks. Virtual meetings (or in-person, post-COVID) are being scheduled, and surveys are being created and distributed. Each of the play systems will be improved based on the particular needs and desires of the surrounding neighborhood
- At the same time that these play systems are being installed, we will also be replacing all picnic tables and park benches and adding more as available and desired
