

**DPS - Expenditure of \$75,000 from the Capital Improvement Fund for
landfill equipment repairs
September 17, 2019**

- The 2012 826H landfill compactor is in need of repairs, including the rear axle, slip differential, final drive, and cleaner bars
- The landfill compactor is used all day/every day to compact waste at the landfill. Constant use has caused the need for these repairs. Our goal is to complete repairs before the equipment breaks down, which could increase the cost of repairs and equipment downtime
- SEP is requested
