

DPS Landfill Infrastructure Improvements, \$100,000

- The Hoffman Road Landfill is operating under a Solid Waste Permit to Install (PTI), effective January 11, 1995
- Ohio Administrative Code (OAC) 3745-27-19 prescribes multiple requirements related to landfill operations and governs daily activities
- The landfill is a dynamic operating environment involving mechanical, electrical, administrative, and civil engineering related infrastructure that are all necessary to operate effectively to ensure continued compliance with the PTI and relevant OAC regulations
- Multiple components of the landfill infrastructure are 15-20 years old and continue to age/deteriorate, requiring repairs, replacement and/or rehabilitation to improve their reliability and effectiveness
- Projects will be prioritized to emphasize regulatory compliance, reliability, impact on day-to-day operations and safety. Longer-term, investing in supporting landfill infrastructure, will tend to reduce expenses related to emergency repairs and mitigate risks associated with non-compliance
