

DPS Ball Field Restoration - \$75,000

- The ball field complex at Detwiler Park has long been the site of a robust schedule of baseball tournaments and ongoing competitive play. Over the years, field 4, closest to Mud Creek has consistently experienced long periods of being flooded
- These funds will provide support to install a drainage system to prevent flooding and allow for regular play on this field all season long
- This improvement will make three of the four ball fields in this complex playable all season
- Having this field playable will also allow for the booking of additional tournament play, potentially generating an additional \$6,000 in revenue each season
