RE: Cargill ABS brine maker upgrade

Cargill Salt – Road Safety is pleased to submit the following quote to upgrade your existing brine maker.

Legacy ABS Upgrade

This upgrade allows you to keep the yellow salt brine tank and all the appropriate hoses. The vertical valve panel is replaced with new electronics, new valves, and a new pump & motor. The horizontal panel is removed and replaced with a new panel and hardware containing the blending and truck fill features.

Components held over from existing installation:

- Yellow salt brine tank
- Vertical Stainless-Steel Panel
- Brine storage tank
- Additive storage tank
- Appropriate hosing

Upgrade Components include:

- All New Electrical control/power enclosures and components
- New HMI/PLC components with all new screen layout, functionality, and latest software version
- New Yokogawa conductivity/salinity-concentration controller and sensor
- New 100 gpm recirculating Pump/Motor
- New KZ valves replacing the existing valves
- New KZ proportional control valve for improved brine concentration accuracy
- Flow meters for accurate accounting of product to storage and trucks
- New Truck Fill Panel with ability to pause brine making to truck a fill, then auto-resume to complete requested amount.
- Truck Fill data logger captures Employee / Truck #, gallons requested, and product usage.
- New level sensor for salt tank, additive tank & brine storage tank
- New air purge valve

NOTE: This quote does not constitute an order confirmation. The prices quoted in this letter are valid for a sixty (60) day timeframe.
