

DPS 2021 SB&H SCM&R FUNDS EQUIPMENT PURCHASE \$185,200

- Case 580sn Backhoe Loaders – This request / purchase is for two (2) backhoe loaders with attachments such as a smaller bucket, concrete hammer, and a plate compactor. These backhoes will be in addition to what SB&H has in stock. Some of the in stock loaders are nearing their useful life and will be retired soon. Backhoes are used to support the city’s street repair programs such as Utility Restorations.
- Crash Attenuators – This request / purchase is for two (2) crash attenuator trailers that will be used within the pothole patching program. The city currently uses backup vehicles with signs and flashers to protect its employees from traffic on the streets. These crash attenuator trailers will be added to the backup truck giving the crews more protection. Crash attenuators will have electronic arrow boards on them and provide a cushion to the vehicle if another vehicle should hit them from behind.
- Case 24” Skid Steer Cold Planer – This request / purchase is for one (1) skid steer attachment that is used in street repairs to mill out asphalt. SB&H currently only has one (1) of these attachments that is used in two (2) programs.
