

DPS Excavator with Forestry Mulching Head \$215,000

- Keeping our intersections, public sidewalks, and walking paths clear of overgrowth is a high priority for safety and usability. This machine will give us the flexibility to address these issues year-round
- Current practice is to rent this equipment at an average expense of \$8,000 per month. With year-round use, the equipment will pay for itself in less than three (3) years
- In addition to utilizing the excavator for this purpose, it would have additional flexibility to be used for other projects on an as-needed basis
