WHEREAS, steps taken toward carbon emissions also aim to improve community quality of life, building community capital and increasing government efficiency, accountability and transparency; and

WHEREAS, local governments have the unique opportunity to achieve both energy use and carbon emission reductions and cost savings through building and facilities management; land use and transportation planning; and through economic and community development; and

WHEREAS, efforts to address energy and climate issues provide an opportunity to move toward energy self-reliance and greater community resiliency and quality of life; provide environmentally healthy and cheaper -to-operate public buildings; encourage new economic development and local jobs; and support local renewable energy production; and

WHEREAS, uncertainty in energy prices and the transition away from fossil fuel energy sources present new challenges and opportunities to both the City of Toledo and to the economic health of its citizens and businesses; and

local, regional and state economies; infrastructure development; habitat; ecological communities, including native fish and wildlife populations; spread invasive species and exotic diseases; reduce drinking water supplies and recreational opportunities; and pose flooding, drought and health threats to our citizens; and

WHEREAS, Power a Clean Future Ohio assists in facilitating technical assistance for the implementation of these carbon reduction policies; and

WHEREAS, the Power a Clean Future Ohio provides cost-effective sustainable development policies in the following four categories: (1) Renewable Energy; (2) Energy Efficiency; (3) Transportation Electrification; and (4) Land Use; NOW, THEREFORE,
