SUMMARY & BACKGROUND:

The Total Station Survey Robotic System purchased in 2012 needs to be replaced since it can no longer be repaired. The Trimble R12 has the ability to track three times the satellites as the current survey system along with the ability to connect to satellites in dense and wooded areas, which will allow surveys to be completed expediently, and with more accuracy. This system is available through Precision Laser and Instrument, Inc., which is a proprietary seller of Trimble products in the Toledo area. This legislation will authorize the replacement of the obsolete equipment.
