Proposed amendment to TMC 945.10
Department of Law
P. Syring (x1020)-Amendment May 26

Amendment of Toledo Municipal Code Section 945.10 related to when a facility owner is or is not responsible to bear the costs associated with moving facilities located in a public right of way; and declaring an emergency.

SUMMARY & BACKGROUND:

On February 21, 2023, Council voted to approve the settlement of a lawsuit captioned *City of Toledo v. Block Communications, Inc.* that had been pending in the Lucas County Court of Common Pleas. Following Council approval, the case was dismissed. Part of the settlement agreement called for the City of Toledo to introduce an ordinance to make certain amendments to Toledo Municipal Code Section 945.10, which addresses, among other things, when a facility owner is or is not responsible to bear the costs associated with the relocation, removal, and alteration of position of facilities located in the public right of way. This ordinance fulfills that specific obligation of the settlement agreement. The agreement does not require Council to approve the proposed amendment to the TMC and, further, Council can exercise its full deliberative authority and take any course of action it determines is in the best interest of the City.

NOW, THEREFORE, Be it ordained by the Council of the City of Toledo:

SECTION 1. That Toledo Municipal Code Section 945.10 which reads as follows:

945.10. Relocation, removal or abandonment of facilities.

(a) Every owner or operator of facilities located in the right of way or on public property shall, at its own expense, temporarily or permanently remove, relocate, change, support, hold or alter the position of any facility when the City shall have determined that such removal, relocation, change, support, holding or alteration is reasonably necessary for any one of the following reasons:

- (1) the need to construct, repair, maintain, improve or use the right of way or public property;
- (2) the need to locate, construct, replace, maintain, improve or use any other City property;
- (3) the efficient performance of City operations.

(b) No permit holder shall, without reasonable compensation, be required by the City to:

- (1) relocate its existing aerial facilities underground;
- (2) relocate, change, support, hold or alter the position of any facility for the benefit of a third party unless that party is performing services in the right of way on behalf of the City or installing facilities that will be owned by the City;
- (3) relocate, change, support, hold or alter the position of any facility for the benefit of a municipal utility providing the same service as and competing for customers with any permit holder;
- (4) relocate, change, support, hold or alter the position of any facility for a non-transportation related aesthetic improvement.

(c) Upon written notice from the Director of Public Utilities, any person that owns, controls or maintains any unauthorized facility or related appurtenances within the right of way shall, at its own expense, remove such facilities or appurtenances from the right of way. If any unauthorized facilities are not removed within the time period set by the Director, the City may remove the facilities or appurtenances from the right of way at the expense of the person that owns, controls or maintains the unauthorized facilities. For the purposes of this section, a facility is unauthorized and subject to removal in the following circumstances:

- (1) upon failure to obtain a right of way permit or upon revocation of the right of way permit for such facility as provided in section 945.19;
- (2) if the facility was constructed or installed or any excavation of the right of way was performed after the effective date of this ordinance without prior issuance of the required right of way permit except as otherwise permitted under this chapter;
- (3) if the facility was constructed or installed or any excavation of the right of way was performed after the effective date of this ordinance in a manner inconsistent with the terms of a right of way permit or the provisions of this chapter.

(d) Each permit holder shall notify the City in writing of its intent to abandon facilities in the right of way. Facilities shall be considered to be abandoned when they have not been used to provide services for a period of one year and are unlikely to be used to accommodate future service growth, or when the permit holder notifies the City of its intent to discontinue the use of the facilities. Facilities shall be allowed to be abandoned in place unless the Director specifies in writing otherwise in which case they shall be removed by the permit holder without cost to the City. In the event of an abandonment in place, the City shall notify the permit holder in writing of its intent to take full title and ownership of the abandoned facilities for the purpose of removing the facilities from the right of way or in order to utilize the abandoned facilities. The permit holder shall have thirty (30) days to respond to the notice except that, in an emergency situation, a lesser amount of time may be specified. The permit holder shall be given a reasonable amount of time to either utilize or remove the abandoned facilities prior to the acquisition of ownership by the City. If the permit holder does not utilize or

remove the facilities within the specified time period or demonstrate to the City that the facilities are intended to accommodate future service growth, the City shall take title and ownership of the abandoned facilities without the need to pay compensation to the permit holder. Until such time as the City takes title to or the permit holder removes the abandoned facilities, the permit holder shall retain all liability and be responsible for all necessary repairs, maintenance and relocation of the abandoned facilities in the same manner and degree as if the facilities were in active use.

(e) The City retains the right and privilege to stop work on any construction, installation or excavation located within the right of way as the City may determine to be necessary and appropriate to protect the public health, safety and welfare.

Shall be repealed and amended as follows:

945.10. Relocation, removal or abandonment of facilities.

(a) Every owner or operator of facilities located in the right of way or on public property shall, at its own expense, temporarily or permanently remove, relocate, change, support, hold or alter the position of any facility when the City shall have determined that such removal, relocation, change, support, holding or alteration is reasonably necessary for any one of the following reasons:

- (1) the need to construct, repair, maintain, improve or use the right of way or public property;
- (2) the need to locate, construct, replace, maintain, improve or use any other City property;
- (3) the efficient performance of City operations.

(b) No permit holder shall, without reasonable compensation, be required by the City to:

- (1) relocate its existing aerial facilities underground;
- (2) relocate, change, support, hold or alter the position of any facility for the benefit of a third party unless that party is performing services in the right of way on behalf of the City or installing facilities that will be owned by the City;
- (3) relocate, change, support, hold or alter the position of any facility for the benefit of a municipal utility providing the same service as and competing for customers with any permit holder;
- (4) relocate, change, support, hold or alter the position of any facility for an improvement whose purpose is primarily proprietary versus governmental, under the law of Ohio.

(c) Upon written notice from the Director of Public Utilities, any person that owns, controls or maintains any unauthorized facility or related appurtenances within the right of way shall, at its own expense, remove such facilities or appurtenances from the right of way. If any unauthorized facilities are not removed within the time period set by the Director, the City may remove the facilities or appurtenances from the right of way at the expense of the person that owns, controls or maintains the unauthorized facilities. For the purposes of this section, a facility is unauthorized and subject to removal in the following circumstances:

- (1) upon failure to obtain a right of way permit or upon revocation of the right of way permit for such facility as provided in section 945.19;
- (2) if the facility was constructed or installed or any excavation of the right of way was performed after the effective date of this ordinance without prior issuance of the required right of way permit except as otherwise permitted under this chapter;
- (3) if the facility was constructed or installed or any excavation of the right of way was performed after the effective date of this ordinance in a manner inconsistent with the terms of a right of way permit or the provisions of this chapter.

(d) Each permit holder shall notify the City in writing of its intent to abandon facilities in the right of way.

Facilities shall be considered to be abandoned when they have not been used to provide services for a period of one year and are unlikely to be used to accommodate future service growth, or when the permit holder notifies the City of its intent to discontinue the use of the facilities. Facilities shall be allowed to be abandoned in place unless the Director specifies in writing otherwise in which case they shall be removed by the permit holder without cost to the City. In the event of an abandonment in place, the City shall notify the permit holder in writing of its intent to take full title and ownership of the abandoned facilities for the purpose of removing the facilities from the right of way or in order to utilize the abandoned facilities. The permit holder shall have thirty (30) days to respond to the notice except that, in an emergency situation, a lesser amount of time may be specified. The permit holder shall be given a reasonable amount of time to either utilize or remove the abandoned facilities prior to the acquisition of ownership by the City. If the permit holder does not utilize or remove the facilities within the specified time period or demonstrate to the City that the facilities are intended to accommodate future service growth, the City shall take title and ownership of the abandoned facilities without the need to pay compensation to the permit holder. Until such time as the City takes title to or the permit holder removes the abandoned facilities, the permit holder shall retain all liability and be responsible for all necessary repairs, maintenance and relocation of the abandoned facilities in the same manner and degree as if the facilities were in active use.

(e) The City retains the right and privilege to stop work on any construction, installation or excavation located within the right of way as the City may determine to be necessary and appropriate to protect the public health, safety and welfare.

SECTION 2. That it is found and determined that all formal actions of this Council concerning and relating to the passage of this Ordinance were performed in an open meeting of this Council, and that all deliberations of this Council and any of its committees that resulted in such formal action, were in meetings open to the public, in compliance with all legal requirements including Section 121.22 of the Ohio Revised Code.

SECTION 3. That this ordinance, being an emergency measure, shall take effect and be in force from and after its passage. The reason for the emergency lies in the fact that this ordinance is necessary for the immediate preservation of public peace, health, safety, and property, and for further reason that this ordinance must immediately be effective so the City may provide clarity as to when a facility owner is or is not responsible to bear the costs associated with the relocation, removal, and alteration of position of facilities located in the public right of way.

Vote on emergency clause: yeas 12, nays 0.

Passed: May 30, 2023, as an emergency measure: yeas 12, nays 0.
